What does it mean to be masculine?

What ancient ideas of the masculine and its symbols continue to be appropriate for our time, and what needs to be re-imagined?

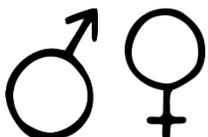

Notions of manhood are as much convenient fictions as cultural or biological truths. Masculinity, like femininity, is an idea that transcends gender – and needs to be reimagined for the 21st century. In his gender theory, Jung understood each of us to contain both masculine and feminine dimensions. In this accessible, interactive session, we will explore contemporary masculinity using media, discussion, and lecture. Both men and women are welcome to join this stimulating conversation.
